

## ***Hand craft business opportunity - TWISTERZ***

Up until 2007 my family created and sold TWISTERZ in Hawaii - a hand painted twisted acrylic product that was very beautiful when hung in the breeze. The business was very successful for us. The business has not been operated for several years, and we now would like to transfer it to someone who would like to take advantage of it. We'll set you up with everything (including a license for our patent) and provide hands-on training and ongoing coaching to make sure you won't fail. The product is very, very popular so if a person follows our "recipe" we are very confident they can own and operate the business very profitably, even if only working part time. The business would be suitable for someone new to crafting or for someone who is already an active crafter. For more information please contact Devin 426-8744.
